

Upgrading and Monitoring the Apigee Hybrid API Platform

Hansel Miranda
Course Developer, Google Cloud

```
<script>
```

Welcome to upgrading and monitoring Apigee hybrid, the third course in the series on Managing Google Cloud's Apigee API Platform for Hybrid Cloud.

```
</script>
```

—

Learn about...

[Upgrade and Rollback](#)

<script>

In this course you learn how to upgrade and roll back the Apigee hybrid runtime installation in your Kubernetes cluster.

</script>

—

Learn about...

Upgrade and Rollback

[Lab](#)

```
<script>
```

We will do a lab to upgrade the Apigee hybrid runtime plane from a previous version to a new version of the software release.

```
</script>
```

Learn about...

Upgrade and Rollback

Lab

[Logging and Metrics](#)

<script>

We will discuss how Apigee hybrid performs logging activities and how you can use the runtime component logs for troubleshooting purposes.

We also review the various metrics generated by the hybrid runtime components.

</script>

Learn about...

Upgrade and Rollback

Lab

Logging and Metrics

[Analytics](#)

```
<script>
```

We will discuss Apigee Analytics and the various types of reporting dashboards available for you to use in Apigee hybrid.

```
</script>
```

Learn about...

Upgrade and Rollback

Lab

Logging and Metrics

Analytics

[Monitoring and Troubleshooting](#)

```
<script>
```

You will learn how to monitor and troubleshoot the Apigee hybrid runtime components.

```
</script>
```

Learn about...

Upgrade and Rollback

Lab

Logging and Metrics

Analytics

Monitoring and Troubleshooting

[Lab](#)

<script>

We will do a lab on Apigee hybrid runtime component monitoring.

</script>
